

Primary Care Service

With each patient, we spend time to get a complete picture of their overall health and how it impacts the health of their eyes, including reviewing records from other providers. Our experienced practitioners take the time to thoroughly assess the health and function of the patient's eyes, including:

- Eye and general health history
- Binocular assessment
- Routine (cosmetic) contact lens services
- Evaluation of systemic disease including diabetes and hypertension
- Eye health evaluation
- Refraction
- Glaucoma and cataract evaluation

We are well prepared to manage many urgent ocular issues:

- Conjunctivitis (red eyes)
- Corneal abrasions
- Sudden onset of double vision
- Ocular allergies
- Foreign body removal
- Sudden onset of flashing lights/ floating spots
- Styes/swollen eyelids
- Sudden changes in vision/loss of vision

Our team stands ready to help your patients with their most urgent eye care needs, returning them to your care once they have been treated.

To refer a patient call (888) 327-5533 or visit www.universityeyecenter.org/referrals
Most major insurances accepted, patients responsible for self-pay or non-covered services.
Financial Assistance may be available to eligible patients.
